Dream With DreamTeam

You are in the best hands, if you are in your own hands. A Dream A Hope A Wish This is where all good things start. One who dares to dream can also bring it to reality.

IF you have a dream in your eyes and you seek that there is a place fertile enough to grow them up, then its your own mind and efforts. When every second that is passing by seems to be tougher than the earlier and when the illusions of a golden job and job satisfaction become fader and fader, will you wait for some magic to take place or will catch up to your dreams by the virtue of your will and talent.

DreamTeam presents a perfect elixir of potential opportunities and challenges that you would love to take on. This is 'FREEDOM' to be envied by the wildest and 'GROWTH' to be admired by the top most. Now remember this is not a marketing gimmick or a multi level marketing plan, rather it's an invitation to a journey of self actualization and achievements, purely based on your own hard work and talent. This is a pure guarantee to bring out the best in you as a manager, a marketing personnel, a programmer and as a event manager. Further the culture you will adopt in and further cultivate is life style to live in.

Be Ware : There is nothing known easy money, those who have the stamina and desire to run and to win may only read the document further.

The basic idea

We all know that the growing number of institutions for professional or non professional degrees are simply increasing the number of skilled unemployed people. Whom to blame is a question that will hold the debate for years to go before we can answer to any of our current issues. We started DreamTeam around 5 years back with a lots of positive dreams in our eyes and a very strong desire to fulfill them. The gist

was to work on original concepts. The key we already knew that we have to work hard and smart till we succeed. The strong commitment and the philosophy of creating Dream to work instead of just capturing opportunities has always brought new and work to chapters to this book. While many of what was earlier planned and succeed. . . and expected could not materialize, the new ray always kept coming and new tracks were always available to run on. From leaps and bounds DreamTeam in now a known name not only in the city is started from but also in other parts of country. Besides, DreamTeam is now also knocking the doors abroad and has received proper recognition for its work.

So, the basic idea of starting DWD program is to team up with like minded people across the world and bring into reality the dream of the strongest network of skilled, self managed, enthusiastic and emotionally professional souls. Working under the umbrella of DreamTeam a DreamMate is a manager, a policy maker and executive and a programmer, if possible. You use the name, the experience and the basic platform to start and to accelerate to unbeatable. This program gives you the opportunity to earn by marketing the wide and unbeatable product range of Dreamteam and by running a very unique and featured portal of your own city. At power with the modern day requirements you can not only earn for your team and yourself but will also add new dimensions to the IT scene of your citi.

Under DWD we offer you to setup and run a DreamTeam unit in the area of the magnitute you can cover and offer the wide range of products and services in your area. Starting from a single PC and a phone setup at home you can eventually take this to a corporate style office very soon.

As a DWD unit you can

- Be a successful IT consultant and service provider in your area.
- Start generating business and revenue for yourself in the form of products and services under this umbrella.
- Manage and run the very interactive and happening portal of your area interconnected with other parts of the country (International might as well).
- Develop your own ideas as project with full guidelines of DreamTeam and to earn royalty on sales by the same network.
- Offer full range of online services in terms of web site development, hosting and promotion.
- Develop business by increasing your team and network in your area.

Instead of worrying about yourself create solutions for others.

- Enjoy every day as a successful and creative day and live a 21st century life style.

Who should Join.

Answer the following

- Are you tired of looking for a suitable job for your kind of skills and satisfaction level.
- Do you feel that you possess strong team management skills and want to use it for your professional growth.
- Is there a strong programming talent in you or your team and you want to work on your own projects that can bring glory to you.
- Do you think that your current job is not offering you the right platform to explore the best in yourself
- Do you feel you have entrepreneurship that it is dying out because of lack of resources and money.

If answer to any of the above is yes then you can join us.

Working or non working young at heart people who believe in themselves and in hard work are welcome in this mission. We suggest no hard and fast qualification but will advocate a clear state of mind for professional settlement in one's life. Now also remember that 'Young' means young at heart. People who believe in their MBA and MCA and any such professional qualifications.

A typical DWD unit will require skill set of Marketing, Technical and support like a football team requires an attack, middle and defense specialists. The most important thing in this setup is the Team Management and team spirits which comes out of proper devotion and long term vision.

You need to make your team, plan your resources which can be as low as a PC and a contact number with an address and that's it.

About DreamTeam

Coming together is beginning, staying together is progress and working together is success

Dream Team is a small group of young and enthusiastic software professionals with a strong desire to stand apart and to earn recognition for positive and creative work.

DreamTeam is mainly known for its intranet and Internet based solutions in Business and in schooling. With more than 5 years of experience in the field of offline automation DreamTeam has its fully independent Programming, Designing and multimedia skill set.

BANKAPON	
	Experience
	Culture
	Vision
	Concepts

DreamTeam is an II level domain registrar and has an experience of maintaining dedicated servers for more than 4 years, we use VB for general automation. . We mainly work on LINUX based tools like PHP, MySql for our Intranet and Internet solutions. We expertise in FLASH, Fireworks, Adobe as well.

Dream Team is official IT consultant to Jodhpur Industries association and is running more than 150 online projects of various industries and educational institutions. Besides this we are also working as IT consultants to prestigious organizations like 'Indian Public Schools' Conference' and 'Spic Macay'.

Starting with a small group of 4 people Dream Team is now a nuclear group of more than 20 dedicated and committed software professionals, each one with the same spirit and enthusiasm to go ahead, on the roads to success to fulfill the dreams we share.

During our last 5 years of working we have strongly emphasized on taking more and more experience and expertise in various field and in collecting knowledge tools to shape any stone to sculptures of dream. This is the beginning of the second phase where we feel that the projects done by the team are of world standard and carry recognition and success where ever implemented. **So it is show time now** .

Currently we posses some unique projects like LITEROM (the most powerful and unique application for any educational institution), WebCrafter (Countries leading online automation projects for business segment) and other very standard products.

t was decided from the beginning that we will work in phases and that in the first phase we will concentrate on bringing in concepts and experience.

“Its not the infrastructure but the ideas that make the base strength of this company”

Our Vision

We have never targeted out sourcing projects from abroad as we never wanted to become a cheap man power provider to the companies abroad. Instead, we very clearly understand the call of the time to develop concepts and products of your own that are practical and leading in its area. We are simply not interested in selling our skills rather we are more interested in selling the finished products from this skill. We have full faith in the youth of the county .

We have to understand that in spite of the fact that India provides the major portion of IT professionals, the country still doesn't have any good / Successful Operating System, Firewall / security products, antivirus products or mailing solutions. To beat the heat we have companies like Infosys to have 'FINACLE' as a leading banking product.

It is important to understand that is not the size or revenue of the team that should help in making you the decision.

Products and services

Weaving ideas and dreams on silicon is the profession we possess.

DreamMates will be promoting and deploying world class software products and providing cutting edge technology solutions to the society. Leading the IT scene and being of a cause is a remarkably good feeling. After having experience and working on your ideas you may also find products developed by you or your team in the same list.

S U C C E S S

 In house products

 On line solutions

 Automation Services

 Third party products.

The products and Services that you will be extending in your area is detailed here forth in the document.

1. In house products

a. LITEROM

LITEROM with its 4th version is a highly interactive, easy, effective and powerful solution for any type of educational institution. It is a complete single solutions (ERP) for school with least cost of implementation and management and is very user friendly.

With its 65 powerful internal and external modules LITEROM becomes the most featured and unique application for education community in India. The various commercial models of the solution gives full flexibility to the schools and educational institutions to adopt it.

With LITEROM Dream Team has provided solutions to one of the best and world-renowned education institutions from India. This includes schools like Birla Vidya Mandir, Nainital, RIMC, Whelham Boys', DPS Jodhpur, St. Anne's Mahesh Sikshan Sansthan and many more.

We are also official IT consultants to Indian Public School's conference and Spic Macay.

LITEROM is unique with its concept and architecture.

USPs :

1. Only solution to offer full two way synchronization from internet to intranet and vice versa.
2. Fully browser based to easy to deploy, manage and use.
3. Very economical
4. Only solution packed with a fully interactive web site of the institution.
5. Fully integrated e-mail systems for members of the institution.
6. Interesting offline and online interfacing.
7. Single point solutions to eliminate redundancy.
8. Highly scalable

b. WEBCRAFTER

Webcrafter is a comprehensive online solutions for handicraft exporters, Book Publishers Engineering firms and other general business segment. It's a fully automated system that works on the principal of 'Be your own webmaster'. The best part about web sites developed under '**web crafter**' is that the owner can manage the web site on his own without any special skills required.

Web sites developed under this project are serving a wide range of exporters and business houses in Jodhpur, Jaipur Delhi and abroad.

c. PULSE

A complete, on point, browser based application for small and medium size nursing homes and hospitals. The special architecture of the application makes its easiest to deploy and manage. It has Internet enabled features to open the doors of modern day working of hospitals.

'PULSE' has been developed in full supervision and guidelines from Goyal Escorts / Goyal hospital and research center Jodhpur. The above is a undisputed leader in health care industry and is affiliated to world famous escorts hear institute.

d. ELITEMAILS

A wonderful idea of providing letterheads in e-mail is developed under EliteMails. Besides e-mail letter head the software also

possesses extremely useful and unique features like Smart Download, Communication Tracking and Mail Merge in e-mails.

e. AAKRITI

A digital catalogue management and production software specially useful for handicraft and other product exporters.

f. WEBCRAFTER Intranet

A single point solution to manage your web site, catalogue and export documentation. The software has many useful features for exporters like query management and wish list.

g. Intranet Mail Server

Intranet based mail server that can provide offline checking and composing of mails in an enterprise. Patched with 'Elitemails' it becomes a smart brand building tool and very controlled and manageable mail system for an organization.

h. Online Solutions for Multi Level Marketing Firms

Multilevel marketing has bloomed very well in last few years. The solution provides them a very smart online presence that not just advertised their brand but also acts as a very effective communication tool among their members. Features like news, schemes and online point viewing for members are extremely useful in their day to day working.

i. E-Shoppe

A full solution for any shop to have an online presence for business.

2. Third party software

DreamTeam has also collaborated with other companies to offer a full range of useful and cost effective solutions to their clients. Although in near future we would like to come up with our original solutions, but in the mean time the present collaborations are with the leading and cost effective solution providers in the same vertical.

We have solutions available in the following segments.

- a. Firewall**
- b. Mail Server**
- c. Content Filters**

- d. **Antivirus**
- e. **Other General Purpose software**

3. Web Solutions

a. Domain Registration

DreamTeam is second level registrar. Domain registration is not good in terms of revenue generation but it helps effectively in getting an entry in an organization.

b. Hosting

We have our own dedicated server customized for various applications and usage. Web hosting solutions can be offered in your area.

c. Development

We offer full range of web site development solutions. Tools used are PHP, Flash etc.

d. Promotion

DreamTeam also has a panel of web promotion experts. This helps in getting good position in search engines for our client web sites. Web promotion is the basic need for generating business queries through web site.

e. Web Based Automation

As most of our software solutions are on line we also offer any kind of web based automation.

4. Multimedia

- a. **Multimedia presentations for company catalogue**
- b. **CD catalogues**

5. Custom Automation

- a. **Stand Alone Software**
- b. **Intranet based automation**
- c. **Intranet and Internet Based Automation**

Citi Portals

Covering India with its spirits .

Most of the online solutions that are working at present has one common drawback that it doesn't covers the local area requirements. Under the city portal program we will introduce interconnected system of portals that will offer national as well as local coverage in terms of data and services. The fields covered will be like.

1. Online Jobs
2. Online Matrimonial
3. Online Advertisement
4. Citi News
5. Sales
6. White Pages
7. Yellow Pages
8. B2B concepts
9. Property
10. Auction
11. Travel
12. Hospitality
- 13. Education**

The turning of the idea of Citi Portals has been done to address the following issues that are not fully addressed by the current names in the respective sections.

1. Reaching a distributed model of working so that the local citi representative manages and populates the site. More people, more information more gain.
2. Citi portals will hold fairly good amount of local contents so that the users is able to see his citi information in it. On the other hand the

G A T E W A Y T O	
S U C C E S S	
	In house products
	On line solutions
	Automation Services
	Third party products.

interconnectivity of hundreds of such portals ensures a very effective coverage of entire country.

3. Providing direct support for more awareness and training required by the user to be comfortable with news ideas based on Internet.
4. Generating a very huge network of direct marketing efforts for the services in the portal.
5. Finally providing a cash transaction of money to the market.
6. On door services by the direct marketing team.
